Pinnacle To Install Cloud Hosted ComXchange Solutions For Springwood Hospitality At Four New Hilton Branded Hotels In Central PA

Operating within a 200-mile radius from their headquarters in York, Pennsylvania, Springwood Hospitality defines themselves as, 'Hilton and Marriott select-service and extended-stay hotel developers and managers'. They also provide third-party management services for hotel owners. Currently Springwood manages approximately 1,200 guestrooms and has completed 25 new property projects. While they already have several Tru Hotels and several Home2 Suites, with these new locations plus others in the pipeline, they will soon become an ownership leader the brand's franchise success.

According to Frank Parker, Pinnacle Director - Hosted Services, "we are installing a cloud hosted ComXchange voice solution by 360Networks LLC, that will link all these hotels to our data center facility in Silver Springs, MD. We are also installing new telephones at each facility".

"We have been really impressed with the rapid growth of Hilton's new Tru Hotels brand", says Bill Mitchell, Pinnacle CEO/VP Cloud Solutions, "I can't remember any hotel flag with a success curve like this one. The 360Networks ComXchange package is also on a solid upward trajectory, especially with our cloud hosted solutions like this project. We have invested a lot in developing our cloud operations and now with ComXchange we can offer very comprehensive and adaptable solutions at a very reasonable cost. That makes us very competitive".
